Injection Drug Use and IDU Risk Behaviors

READ: The next question will ask you how many times have you injected drugs in the past 3 months. To help you figure this out we have provided some examples. These examples are based on whether you inject daily, weekly, or monthly.

So for example,

If you inject 4 times everyday, this means you have injected 360 times in the past 3 months.

Or if you inject 4 times a week, this means you have injected 52 times in the past 3 months.

Or if you inject 3 times a month, this means you have injected 9 times in the past 3 months.

Use Sheet A to help you figure out how many times you have injected in the past 3 months. You can also call you host if you have difficulty.

- C1.** How many times have you injected any drug in the past 3 months? To help you come up with this number, please look at the sheet marked, A, next to your computer. It is a copy of the previous screen. After entering the number, please click on the "NEXT QUESTION" button.
