## SUDIS MEN'S QUESTIONNAIRE

#### Introduction:

Thank you for being a part of this study. Some of the things I will ask about are very personal. I want to make sure you understand that all of your answers will be kept confidential, meaning that they are private and will not be shared with others. Your name will not be written on this survey to add more protection of privacy. All research material will be kept in a locked file and destroyed after the research has ended.

Your answers will be used to help design programs for other people with HIV. Try to be honest in the answers you give. For example, some people feel it might be better to say that they always use condoms or never share outfits. But for this study, there are no right or wrong answers. I am most interested in your feelings, thoughts and experiences.

If you have any questions, feel free to ask them at any time. Some questions sound the same, but please answer all of them, because they are all important for this research. If you need to take a break during the interview, please let me know, because we can do that.

If you have questions, or things that you'd like to talk about after this interview, you can call Kelly Knight 415 597-4651. Also, the agencies and individuals in the Community Referral Guide included in this packet might be helpful in answering your questions or connecting you with other services.

	SECTION A: HIV AND YOUR HEALTH

## SECTION B: GENERAL SEXUAL RELATIONSHIPS & ACTIVITIES

The next several sections of this interview are about sex. Different people have different definitions of sex. Here we would like to you to think of "sex" as something that can include: <u>vaginal sex</u> (penis, fingers, or sex toys in vagina); <u>anal sex</u> (penis fingers, or sex toys in anus or butt); <u>oral sex</u> (mouth in contact with a penis or vagina or mouth in contact with an anus); or any other activity that can result in you or your partner having an orgasm.

This definition of sex DOES NOT include, however, activities where you and your partner did not have physical contact (like phone sex), or sexual activities, such as kissing.

##

## Section D: PAID OR TRADING SEX PARTNERS

Introduction: The next set of questions is about your sexual experiences only with partners whom you have paid or traded something specifically in exchange for them giving you sex. This could be money, food, drugs, or a place to stay. This does not include your main sex partner, people you have sex with for fun, or someone you are considering for a serious relationship. From this point on, I will refer to these partners as "paying partners."

INTERVIEWER: May use 3-month calendar to anchor significant dates and to assist respondent recall.

## SECTION E: CASUAL SEX PARTNERS

### Introduction:

The next set of questions is about your experiences with casual sex partners. This might include someone who was a one-time partner, an occasional partner, or someone you are considering for a serious relationship. They do not include your main sex partner or your paying partners (i.e. people who pay you or trade something specifically for sex.) From this point on, I will refer to these partners as "casual sex partners."

INTERVIEWER: May use 3-month calendar to anchor significant dates and to assist respondent recall.
