### Section

[A. Introduction: The 1996 NSHS in a nutshell](#)

[B. Sample Design & Procedures](#)

1. Study Population

2. Sample Design

- a. First Stage Sample Selection
- b. Screening Potential PSUs
- c. Sample Management

3. Sample Design Specifications (completed & partial interviews, etc.)

a. Sample Disposition Results

Completed interviews; partial interviews; noncontacts; eligibility unknown; never answered; refusals; not eligible; not eligible non working residential number (WRN); discontinued; business/government; modem/fax; car/cellular phone; not a housing unit; not eligible WRN; not regular housing unit; age ineligible; duplicate household (HH); language barrier; not interviewable.

b. Response Rates: Calculations & Formulas

4. Weighted Analysis of 1996 NSHS Data
5. Construction of Analysis Weights
  - a. Description of weights construction
6. Procedures for Sampling Error Estimation
  - a. Sampling Error Computation Methods & Programs
    - i. Linearization Approach
    - ii. Resampling Approaches
    - iii. Sampling Error Computation Models
7. Disposition Codes
8. Survey Methods Group (SMG) Memoranda  
Related to Data Collection
  - a. Questionnaire Administration Policy Changes
  - b. S6 Probe
  - c. Over 50 and hesitant to do the survey?
  - d. Proposed policies regarding reading the FABS definitions
  - e. Home test kit
  - f. The latest
9. References

## C. Instruments

1. English Version Questionnaire
  - a. Screening Questionnaire
  - b. NSHS Questionnaire Guidelines
  - c. NSHS Questionnaire Map
  - d. English Instrument
  
2. Spanish Version Questionnaire
  - a. Screening Questionnaire
  - b. NSHS Questionnaire Guidelines
  - c. NSHS Questionnaire Map
  - d. Spanish Instrument

## D. 1996 NSHS DATA MAP OF VARIABLES & UNIVARIATE STATISTICS

1. By Position in Questionnaire:
  - a. Variable Map
  - b. Dictionary Map of Variables
  - c. Univariate Frequencies of Selected Variables
  
2. By Alphabetical Order of Variable Names:
  - a. Variable Map
  - b. Dictionary Map of Variables
  - c. Univariate Frequencies of Selected Variables

## E. Derived Variables

1. Numbers of partners
2. Types of Sexual Partners
3. Orientation
4. Male-Female Condom Use
5. Male-Male Condom Use
6. Sexual Risk for HIV
7. Transfusion Status and Intravenous Drug Use Status
8. Small City Definition and Derivation
9. Help-Seeking Variables for Sexual Problems & Sexual Abuse
10. Primary Partner (Imputation)

## F. Current Work

## G. Contact Information
